Of the Eclipses this Year, 1684.

Here will be four Eclipses this year, viz. two of the Sun, and two of the Moon. The first will be an Eclipse of the Sun on *Ianua-* the 6. day, at 8 a Clock at night, in the 26 degree of *Capricorn*, a Eclipse, but invisible to us, because the Sun will be set.

The second will be an Eclipse of the Moon, on *June* 17. in the 6. degree of *Capricorn*, and will be visible to us, as followeth.

On *October* the 3th there is a Conjunction of *Saturn* and *Mars* in the 13th of *Virgo*, which Astrologers say is a sign of much wrangling and treachery in the World, especially in those places under *Virgo*.

Also I find the most part of the Eclipses this year, and especially those which are visible to fall in *Cancer*, and the rest falling in its opposite *Capricorn*, which shews great alterations in those Kingdoms under the *Moon* and *Cancer* viz. *Scotland*, *Holland*, *Zealand*, &c. the effects whereof partly falls in this year, and partly in the year following viz. 1685. As also in the 1685. I find a visible Eclipse in the same sign *Cancer*, which is admirable that the *Moons* and *Sun* should eclipse others Lights so often, the sign being the *Moons* House :

The four Seasons of this Year, 1684.

The Spring Season begins on *Munday*, *March* 10. making our days and nights equal.

Summer Season begins on *weanesday*, *June* 11. the days are then at the longest, and nights at the shortest.

Autumn, or Harvest Season, begins on *Friday*, *September* 12. the days and nights again equal.

Winter Season begins on *Thursday*, *Decemb.* 11. making the shortest day and longest night in the year.

The four Termly Quarters of this year, 1684.

The first Termly Quarter begins on *Saturday*, *February* 2. called *Candlemas-day*.

Second Quarter begins on *Thursday*, *May* 1. though the Vulgar reckon from *May* 3. called *Rood-day*.

Third Quarter begins on *Friday*, *August* 1. called *Lammas-day*.

The fourth and last Termly Quarter begins on *Saturday*, *November* 1. which is called *Hallowday*, so that *Hallow Even* this Year falls on *Friday* at night.

These are therefore intreating all my noble Merchants, thriving Chapmen, and Countrey Gossips, (for their own good) to repair to these yearly Fairs, at *Tarves* and *Methlick*; where they will find upon each *Tuesday*, all sorts of good cheap merchant Goods, all kind of Countrey Cloath, Stockings, and other Countrey Wares, with meat for nothing, if you drink abundance: and upon each *Wednesday*, all sorts of Horse, Oxen, Kine, Sheep, and other Cattel to be sold, as cheap as the Countrey can afford, for ready money.

There are also four yearly Fairs within the Shire of *Angus*, belonging to the truly Noble Earl of *Airly*, which are as followeth.

The first is called *Colms* fair, which stands on *Muirsketh* near the Kirk of *Corrachy*, upon the 2. *Tuesday* of *June*. The second is called *S. Ninians* fair, which stands upon the Muir of *Alith*, upon *Tuesday* before *Whitsunday*. The third is called *Mary* fair, which stands upon the foresaid *Muirsketh*, near the Kirk of *Corrachy*, upon the 2. *Tuesday* of *September*. The 4. is called *S. Davids* fair, which stands upon the foresaid Muir of *Alith*, the 1. *Tuesday* of *October*. These are likewise giving you advertisement, that these four special Fairs, standeth each of them four compleat days, where all sorts of Bestial, Countrey Commodities; and all other necessities are to be found, for ready money.

Observations

Observations of Erra Pater.

AS I find in the Science of *Astronomy*, there be four manner of Cholers in mans body, of the four Complexions. The first is Blood; the second, black Choler; the third, Flumes; the fourth, yellow Choler: And if one of the four lack, all the Body will be forthwith dead; for as much as sustaineth one of them in the body as the other.

And each of them ought to be at a certain, for if one of them surmount the other, all the body shall have damage thereby, and all four be perillous: for if the Blood surmount the other, it will soon destroy and overcome the body, and make him die: for it gathereth, and likewise congealeth even right on the Heart and the Breath: and in that manner lessening by little and little, is overcome and dead; but all that time, when the great courie taketh him, it may soon be asswaged by taking away a little blood.

Also the black Cholers be right perillous, and if they surmount the other, they do great damage to the Body, by many and divers means; for they cause the Body to fall, by the Evil-sickness, and to lose his wit and knowledge, and become a Fool; and they cause all the body to be full of evil Scabs, and oft times to be measl'd; and they make a man to be fearful and a Coward, and of many ill manners.

The Flumes that be white be right perillous also, when they surmount the other Cholers of the Body, they do great damage and hurt: for they engender Gouts, and many other evil Sickneses that be cold &c.

Also the yellow Cholers be perillous: for when they surmount the other Cholers in a mans body, they assorvant the Heart, and trouble the Brain, and make all the Members feeble and soft, and take away the Will and Appetite from the Body; that it may neither eat nor drink: and also they change a mans colour, and make him to lose his Sight and become Blind.

The four Humors be of four Complexions, and they have the domination of the Body four times in the Year.

It is to be understood that in the Year are twelve Months, and in the twelve Months are two and fifty Weeks, and in the two and fifty Weeks are three hundred threescore and five Days, and in three hundred threescore and five Days, are contained eight thousand seven hundred and threescore Hours.

To know (at any time) how many days old the Moon is,
nothing is better then your Yearly Almanacks, for to reckon
always from the day of the Change. But know, that if the
Moons Change be before 12 a clock of the day, that, then the
day is Prime or first day of the Moon, but if after 12, then
the next day is Prime.
